

Jatinder Kumar

+91-8968148375 | jatinder557721@gmail.com | [LinkedIn](#) | [GitHub](#)

AI/ML engineer with hands-on experience building and deploying machine learning and deep learning models. Skilled in Python and Scikit-learn, with practical experience in model development, API deployment, and generative AI using LangChain and LLMs.

EDUCATION

Sri Guru Tegh Bahadur Khalsa College, Anandpur Sahib

July 2022 – July 2025

Bachelor of Science (Hons) in Artificial Intelligence & Data Science | CGPA: 7.09

GSSS, Nurpur Bedi

March 2022

12th (Non-Medical) | Percentage: 79.6%

EXPERIENCE

AI/ML Intern, 9i Technologies

Oct 2024 – Present

Tech Stack - Python, TensorFlow, FastAPI, Pandas, NumPy, LangChain

- Built and trained machine learning models for classification and prediction tasks on real-world datasets, evaluating performance using accuracy, precision, recall, and F1-score.
- Developed deep learning models with TensorFlow, designing ANN and CNN architectures for image classification tasks.
- Built an AI-based house price prediction model, deploying it as a REST API using FastAPI.
- Developed a GenAI code assistant using LangChain and LLM APIs, integrating prompt-driven code generation into a working tool.
- Worked with training/testing datasets and applied techniques to diagnose and mitigate overfitting and underfitting.
- Used Pandas, NumPy, and Matplotlib for data analysis and visualization as part of the model development workflow.

PROJECTS

AI Resume Builder

Aug 2026 – Sep 2026

- Built a conversational AI resume builder using an LLM (OpenAI API) to collect candidate details through a step-by-step chat interface and auto-generate tailored resume content.
- Designed a content-based job recommendation engine to match candidate skills, location, and experience against a job dataset, and implemented automated PDF resume generation using ReportLab.
- Deployed the application on Streamlit Cloud with secure API key management.

Multi-Agent AI Research System

Mar 2026 – Apr 2026

- Designed and built a multi-agent AI system with planner, executor, and evaluator agents to study agent communication, coordination, and task distribution.
- Implemented an LLM-based reasoning and planning layer within a multi-agent architecture to improve decision-making and scalability.

Car Price Prediction

Jan 2026 – Feb 2026

- Developed a FastAPI-based machine learning API to predict car selling prices, training and deploying a Random Forest regression model.
- Implemented data preprocessing with one-hot encoding for categorical variables and used Pydantic for robust input validation.
- Built high-performance REST endpoints for real-time inference, with auto-generated API documentation via Swagger UI.

TECHNICAL SKILLS

Languages: Python

Analytical Tools: NumPy, Pandas, Scikit-learn, Jupyter Notebook

Technologies: Machine Learning, NLP, REST APIs, FastAPI, LangChain, Generative AI, Model Deployment

AI Tools: LangChain, LLMs

Areas of Interest: Machine Learning, Generative AI, Data Analysis, API Development, Problem Solving
